GST REGISTRATION PORTAL

INDIGEN TECHNOLOGIES

PUNE

GST Challenges

- For Correct invoicing with GST, all the business houses need to collect the GST registration number from each of their existing and new customers and similarly get correct HSN/SAC codes with GST registration number from all of their Vendors.

- With large number of vendors and customer associated with every business it's a challenging task to communicate and follow-up to get the GST related information from each of their Vendors and customers.

For GST Implementation ERP Master data update with GST related information is critical

# Indigen GST Registration Portal

- Indigen GST registration portal (GRP) automates all the task for getting the GST related information from all the vendors and customers.

- It provides

  - Vendor Management
  - Customer Management
  - User Management

- Finally, the Master data can be exported to excel files to update in ERP or Optionally use Indigen Vendor/Customer Master Portal to update in SAP.

- Mulitple group companies support.

GRP Vendor Management

- Under **Vendor Management**, GST related information viz. HSN Codes, SAC Codes, GST Registration Number and GST registration status along with other related master data is requested and collected from each Vendor automatically by the portal.

- Email notifications are sent to each vendor and if the requested data is not submitted then reminder emails are sent as a follow-up

- User can verify the status of all the Vendors and generate report.

GRP Work Flow

Can be Customized to meet the specific Business need for additional data collection if any.

GRP Customer Management

- Under **Customer Management**, GST Registration Number and GST registration status along with other master data is requested and collected from each of the Customer automatically by the portal.

- Email notifications are sent to each Customer and if the data is not submitted then reminder emails are sent as a follow-up

- User can verify the status of all the Customers and generate report

GRP User Management

- **User Management**, handles tasks related to system Admin to create new users for the portal, define users Role, email updates.

GRP Business Benefits

- No Manual intervention or follow-up to collect the GST data for large Vendor and customer base.

- Significant Time Savings to meet GST implementation timeline.

- Easy Tracking to avoid last minute surprises about missing GST data

- No delay in invoicing due to lack of GST information

- This creates Opportunity to get the current Master data updated for all the Vendors and Customers
